Queen Alice

Amelia Sales *Dossom Studio*

RULEBOOK

Queen Alice

Alice has received a strange call for help. Some words written backwards have appeared on the mirror in her living room: "Alice, we need a new queen". Surprised, but without hesitating for a moment, she touches the mirror and realises that her hand can pass through it. Following her hand, the rest of her body is pulled to the other side of the mirror…

In Queen Alice, each player belongs to "The Court of the Looking-Glass World" and is tasked with preparing Alice's coronation banquet. The person who performs the best work will become the new Queen's chief advisor, and thus, win the game.
To achieve this, players must convince the chess pieces that inhabit this world to lend their aid with the preparations. The Court's influence will be key to the coronation. Depending on which Colour of pieces contributes the most to the banquet, Alice will be crowned either the White Queen or the Red Queen—or perhaps even both!

Will you manage to pull the strings of the realm in your favor and ensure Alice is crowned with the Colour that benefits you most? Will you become the most influential person of the new Queen Alice's era?

Queen Alice is a game inspired by Lewis Carroll's Through the Looking-Glass, and What Alice Found There, using some of its characters and part of its narrative centered on chess and its pieces. However, we have created our own story and it is not intended to be a representation of the one Lewis Carroll presents in his book.

Section Summary: Queen Alice is an engine-building game where players are members of the Court preparing Alice's coronation banquet. The goal is to gain the most influence (Influence Points) by utilizing the Chess pieces, with the game's final scoring influenced by whether Alice is crowned Red or White.

Components

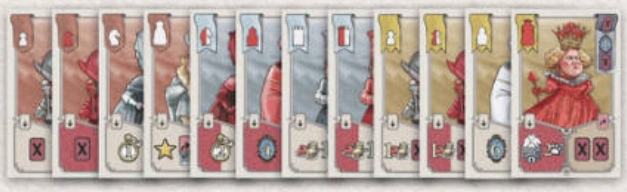

1 x Central board

4 x Action boards

1 x Cards board

90 x Cards (30 bronze + 30 silver + 30 gold)

FOR EACH PLAYER (x 4)

9 x Red pieces

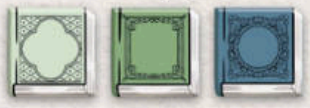

9 x White pieces

Red Alice | Red Humpty Dumpty | Red gardener

White gardener | White Humpty Dumpty | White Alice

27 x books (in 3 colors)

32 x Live Flowers (8 of each)

42 x Bookmarks

16 x Alice Wishes

4 x 200/300 IPs

11 x Crowns

First player token

16 x Train cards

Solo cards

Courtier board

Influence points marker | 3 x colour resources

Clock

2 x Pawn markers

Player aid tile

20 x Diamonds

20 x Hearts

King's messengers (Hatter & March hare)

2 x Twins (Tweetledee & Tweetledum)

5 x Black resources

10 x Basic cards

Chess movement aid card

Common Setup

Follow these steps to prepare the playing area:

1 · Main Boards: Place the Central, Actions, and Card Market boards centrally, using the side corresponding to the player count (1-2 ●● or 3-4).

2 · Chess Pieces: Shuffle "Player Aid Tiles", draw one, and set up the main board's chessboard as indicated on the tile's back.

3 · Alice's Wishes: Form four stacks by icon type. Shuffle each, draw one from each to form a set of four (for first games, use the 4 specific tiles shown in the image). Shuffle this final set and place them randomly into the designated spaces showing their yellow side.

4 · Crowns: Place at the bottom of the Chess board based on player count: 8 (4 players), 7 (3 players) or 6 (2 players) on their x2 side.

5 · Alice Pieces: Place the pieces at the start of each matching-Coloured progress track (Alice's Path).

6 · Card Market: Set aside the player Colour cards and separate the rest by Bronze, Silver, and Gold to form three decks. Then shuffle each deck. Fill the Card Market display with two cards from each level. Place decks face-up in the rightmost space of their respective level. These top cards are also available for acquisition.

7 · Action Pieces: Place 7a) White and red Gardeners in the Hearts board; 7b) The Messengers: Hatters and March Hares, in player Colours, in the Spades board; 7c) White and red Twins, in player Colours, in the Clubs board; 7d) White and red Humpty Dumpty's halves in the Diamonds board.

8 · Bookmarks, Books and Flowers: Place the Tweedledee - Tweedledum bookmarks next to the Clubs board arranged in different piles depending on its cost (amount and Colour of books in the top of the tile). Create a reserve of the book tokens next to this board too and a reserve for the 4 colour Living Flower next to the Hearts board.
8a) In the Clubs board, Place 1 White book on every space with non-printed books.

9 · Pawprints: Place the pawprint markers, in player Colours, in the two Cat Progress Track. One marker per player in both Red and White tracks.

3-Player Preparation: In 3- player games, take the set of components for the unused Colour to cover the spaces marked with ♣♣ in the Garden board (Hearts), the Wall board (Diamonds), and place Crowns to cover the marked spaces in the Alice tracks.

First Player: The last person who looked in a mirror begins the game. If in doubt, choose the starting player randomly and give them the Mirror Token.

Section Summary: The Central Board, Action Boards and Card Market board are placed in the center of the table and Chess Pieces are laid out according to the reference tile (player aid back), Alice's Wishes Tiles (randomized, one per action icon), Crowns and Alice pieces are placed in the main board.

Player Setup

1 · Board and Tokens: Take a Courtier Board and the corresponding tokens of the same Colour and place the acrylic clock hand in the clock illustrated in the board.

2 · Token Placement: Place the 2a) Heart and 2b) Diamond tokens of each Colour (red/white) in the indicated areas (See image).

3 · Initial Resources: Place the three Resource Cubes in your personal Storage area.

4 · Black Cubes: Take 5 Black Cubes and place them in the designated reserve.

5 · Starting Deck & Draw: Take your 10 Colour-coded basic cards. Shuffle the deck, place it face-down in your Draw Area and draw 3 cards to form your starting hand.

6· Player Aid: Take the player aid of your Colour.

Influence Point (IP) Track: Place the IP marker on space "0" of the IP track in the main board.

Train Cards

7 · Selection: Each player receives 2 Train Cards. Secretly choose one and decide whether to play it for the White side or the Red side.
Resolution: Reveal the chosen cards simultaneously. In turn order, players gain all rewards shown in their selected card.

> Note: Only the specific icons shown on the card are granted; these may differ from the standard rewards of the locations when performing the standard action.

Once these steps are complete, the preparatives for the coronation can begin.

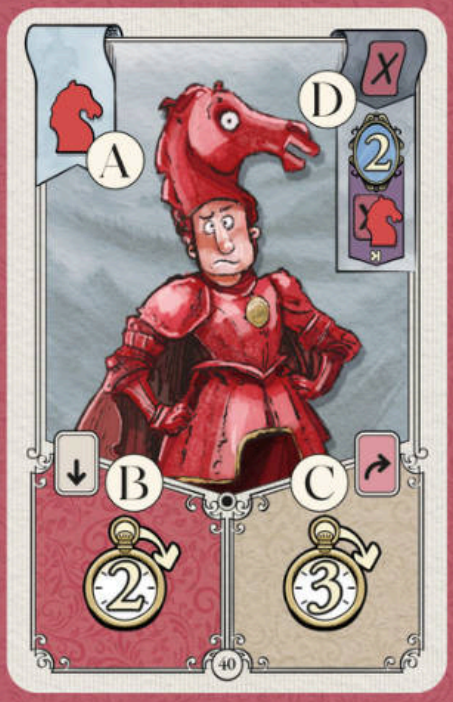

Train Cards Example: Cris choosesthe red side of the Twins Train Card. She advances the Red Twin 1 space and gains the Card-Time Bookmark, 3 Time, and the Toast shown on the card. She does not gain the Booksfrom the space where the Twin arrived, as only the rewards printed on the Train Card are granted.

Section Summary: TheCentral Board, Action Boards and Card Market board are placed in the center of the table and Chess Pieces are laid out according to the reference tile (player aid back), Alice's Wishes Tiles (randomized, one per action icon), Crowns and Alice pieces are placed in the main board.

How to play

In Queen Alice, you prepare the coronation banquet by performing actions across the Looking-Glass World and moving Chess pieces to gain the assistance of its inhabitants.

Card Structure

Cards drive the game engine and are categorized into four levels: Basic, Bronze, Silver, and Gold. Each level features a unique background and banner shape. The starting deck only contains Basic Cards, but more powerful cards can be acquired during the game.

All cards are divided into 4 sections:

A · Chess piece: Indicates the Colour and Chess piece you may move. Wild Piece Cards allow you to move the corresponding piece of either Colour.

B · Play Reward: Grants an instant reward when the card is played.

C · Discard Reward: Grants a reward if the card is discarded at the start of your turn.

D · Invitation Bonus: Displays Influence Points (IP) awarded at the end of the game if the card is Culled.

BASIC CARDS

BRONZE CARDS

SILVER CARDS

GOLD CARDS

Culling: When performing an Invitation action (X) , place the card at the bottom of your Courtier board. It is removed from your deck for the rest of the game, but counts toward your final score. You can cull cards from your hand or discard pile.

NOTE: you cannot cull a card if it would empty your hand before your turn, or if your total number of non-culled cards is 3 or fewer.

Section Summary: Cards are categorized by level (Basic, Bronze, Silver, Gold). They serve three purposes: the Main Action (center) for moving a piece and performing an action an the "when played" reward (bottom-left); a Discard Reward (bottom-right) gained during the first phase of a turn; and Invitation bonus (top-right) gained during the final scoring if the card is removed from the deck using the Invitation (cull) action.

Central Board Structure

The Central Board integrates the Chessboard (A), Alice's Path (B), Crown Display (C), and Cat Progress Tracks (D).

The Chessboard

Used to select actions and obtain resources when activating a Chess piece.

(1) Columns : Determine the Action to perform.

(2) Wild Action: The central column allows any action for a cost of 1 resource.

(3) Rows: Determine the Resource obtained.

(4) Wild Resource: The two central rows allow you to choose any of the 3 resource types.

Alice's Path

Alice's path represents her journey through the Looking-Glass World, marking her decision to become the Red or White Queen.

(5) Alice Progress: When gaining Alice Progress ( ) move the matching coloured piece to the next empty space (from bottom to top) and score the points covered. If the next space contains a Crown, skip to the next empty space.

(6) Alice's Wishes: When Alice reaches an Alice Wish (scoring condition) space:

· Remove 1 Crown from the display immediately, place it on top of Alice's Wish as a reminder before scoring the points shown on the Path space.
· Complete your full turn (including repeated actions).
· All players score this Alice's Wish at the end of your turn.

(7) Throne space: Reaching first the end of a path dictates the Colour of Alice's coronation and removes 1 Crown. Subsequent progress in that Colour grants 5 IP and removes 1 Crown.

Note: Only one Colour can reach the Thone space. Alice's marker in the other Colour can still advance in its path, but will never access that Throne space. Subsequent progress in that Colour grants 5 IP and removes 1 Crown.

TIP: Moving Alice grants you a significant quantity of Influence Points and also triggers the different Alice's Wishes scoring, choosing wisely when and which path to advance!

Crown Display

Crowns act as multipliers and game-end triggers.

Gaining Crowns: Crowns are gained when performing the different actions as it would be explained in the Actions section. When you gain a crown: Take a Crown from the display and place it on the next space ahead of Alice's current position of the matching action Colour on Alice's Path. You gain double the points printed on Alice's Path.. The next time Alice progresses in the path she will skip the space containing a crown to the next Alice Path space without a crown. Note: Crowns cannot be placed on Alice's Wish spaces.

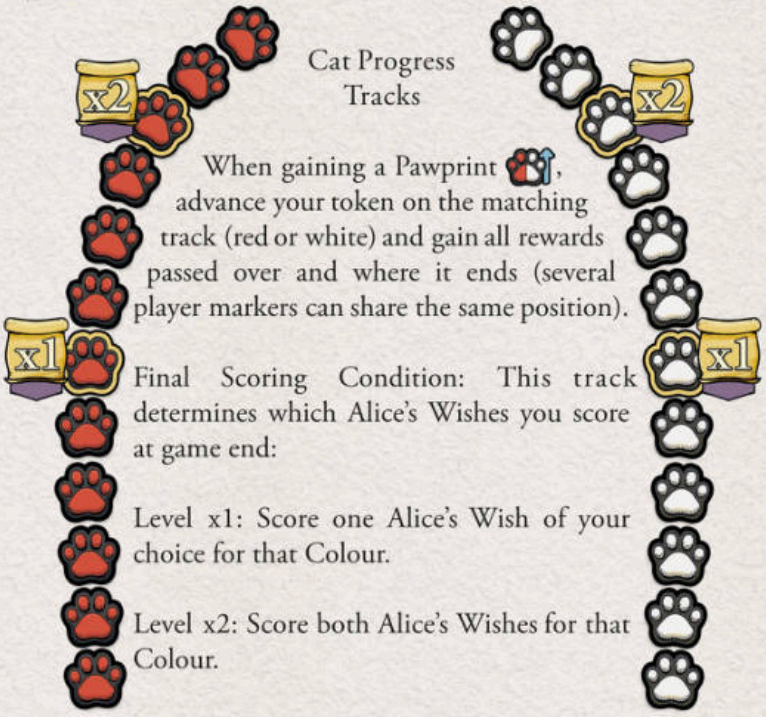

Absence Bonus: When gaining a Crown and no spaces are available on the corresponding path or no Crowns remain, gain 10 IP instead. If the path is full, but Crowns remain, the Crown is still removed from the game.

Game End: Triggered when the last Crown is removed. Complete the current round until the player on the right of the one with the Mirror token has taken their turn, so all players have had equal turns.

TIP: Placing Crowns during the game is very important as this grants you a large amount of Influence Points.

Cat Progress Tracks

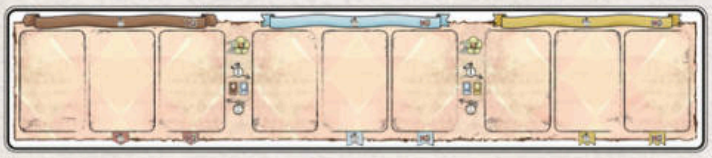

When gaining a Pawprint, advance your token on the matching track (red or white) and gain all rewards passed over and where it ends (several player markers can share the same position).

Final Scoring Condition: This track determines which Alice's Wishes you score at game end:

Level x1: Score one Alice's Wish of your choice for that Colour.

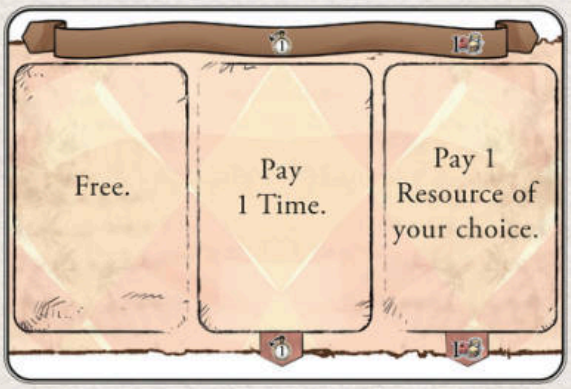

Level x2: Score both Alice's Wishes for that Colour.

TIP: Progressing in cat's tracks does not grant you big rewards during the game, but scoring Alice's Wishes at the end of the game will, possibly, score you a high amount of Influence Points.

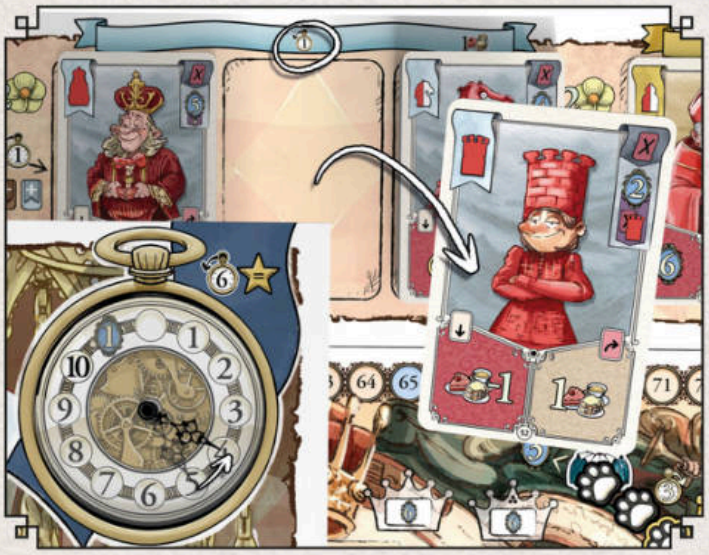

Card Market

Contains Bronze, Silver, and Gold cards across three blocks. Costs per Block:

Acquisition: Cards are added directly to your hand and are usable immediately. The market only refills during the Rest step by sliding cards to the left to fill the gaps.

Acquisition Example: Camila acquires a Silver card from the middle slot. She pays 1 Time and adds it to her hand. The slot remains empty until her turn ends and the Rest step occurs.

Section Summary: The Central Board is focused in actions and scoring. The Chessboard combines resources in the rows and actions in the columns. Alice's Path grants IP, triggers Alice's Wishes scoring, and determines the final Queen Colour (White and/or Red). The Crown Display tracks remaining Crowns and triggers the game end. The Cat Tracks grant rewards during the game and grants final scoring conditions. The Card Market is where players acquire new and more powerful cards for their deck. Advancing in Alice's Paths and Cat Tracks and, above all, gaining Crowns are the main way of getting points and achieving victory.

Courtier Board Structure

The Courtier Board (Personal Player Board) is organized into several zones:

Upper Zone

A . Black Cubes Stock: Holds Black Cubes before they are gained as additional storage.

B · Turn Structure Aid: Steps to follow on your turn.

C · Resource Storage: Consists of Unassigned Cubes area (silver platter from now on) and 3 resource zones: Cherry Cake (Red), Tea (Brown), and Buttered Toast (White).

D · Time Clock: Tracks accumulated Time. Advance this marker whenever you gain Time, and move it counterclockwise whenever you spend it. You can't go over 10 and you can't have less than 0. Whenever you have to go over 10 time, take 1 Influence Point instead.

Resource Storage Management

Gaining Resources: Move a cube from the Silver Platter to the specific resource zone.

Spending Resources: Return a cube from the resource zone to the Silver Platter.

Reassignment: If the Silver Platter is empty when gaining a resource, you may return any of your used cubes to the Silver Platter and then assign it.

Black Cubes (Additional Capacity): Once unlocked, they function like Coloured cubes.

Paying time and black cubes as a resource: You may use 3 Time to pay for any 1 resource. You may pay for any number of resources this way. You cannot use this effect to store a resource; this is for immediate payment only. You may return one or more Black Cubes to your Locked Stock to pay for resources within a single action. You CANNOT spend a Black Cube that you have already used as a resource payment in the same action. However, when performing a Repeat Action, any Black Cubes used (returned to your platter) during the initial action are considered available to be unlocked and spent again. This is for immediate payment only.

Crown card marker: you can use these cards, sliding them beneath your board, to mark the number of crowns you have reached of each color (form 0 up to 4).

Central and Lower Zone

The rest of the board is divided into elements of the Red Kingdom (left) and the White Kingdom (right).

1 · Diamonds (Wall bricks): When performing the Diamonds action, choose any brick to place and gain the indicated reward.

2 · Jail: Located below each Diamonds area; holds opposite Colour captured pieces and displays associated capture rewards.

3 · Hearts (Garden roses): Placed from bottom to top. Indicates the placement cost and the reward granted when unlocked.

Section Summary: The Courtier Board tracks Time and Resources (Cherry Cake, Tea, Buttered Toast) via movable cubes. Black Cubes act as an extra resource storage. It also contains the track for Hearts (Garden roses) and Diamonds (Wall bricks) that grant rewards when their spaces are unlocked,, and a Jail for captured pieces.

Turn Structure

Each player's turn proceeds through four phases (3 of them are mandatory):

a) Discard a Card.
b) Play a Card.
c) Repeat Action (Optional).
d) Rest (Cleanup).

a. Discard a Card

Choose one card from your hand to discard and gain the Discard Reward. Place the card face up creating a discard pile.

b. Play a Card

Choose a second card from your hand to play, placing it over the card you just discarded.

Gain Bonus: Receive the Main Action Bonus printed on the card. Discounts shown in a card are applied only once per turn. (Note: Basic cards do not grant a play bonus).

Move or Rescue: Activate the Chess piece indicated on the card.

Movement: Move the piece in the chessboard according to standard Chess rules (refer to the Chess Player's Aid). Note: Pawns are restricted to moving exactly 1 space in any situation.

Rescue: Alternatively, you may "rescue" a piece of that type from a jail (yours or an opponent's). This piece will not move, refer to the "Rescue" section.

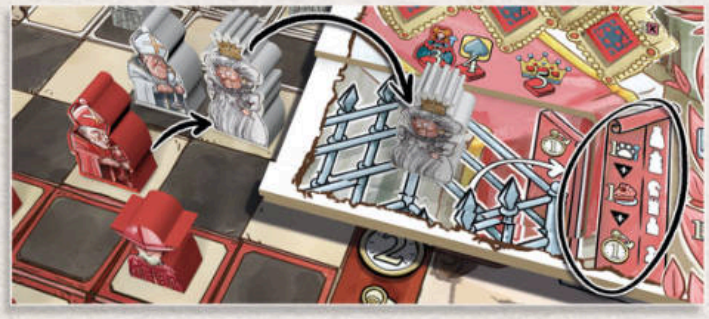

Resolve Space: Resolve the landing space by activating the Row (Resource) first, followed by the Column (Action). Actions are always performed using the Colour of the moved piece.

Blocked Piece: If the piece cannot move, resolve the Row and Column of its current position. This includes pawns: you can use a blocked pawn even when other pawns can move.

Capturing: Captures follow standard Chess rules. If your movement ends on a space occupied by a piece of the opposite Colour, capture it and place it in your Jail (red pieces go to white jail and white pieces to the red jail as indicated by the iconography) to gain cumulative bonuses:
Pawn: 1 Time.
Knight/Bishop/Rook: 1 resource + 1 Time.
King/Queen: 1 captured-Colour Cat Pawprint + 1 resource + 1 Time.

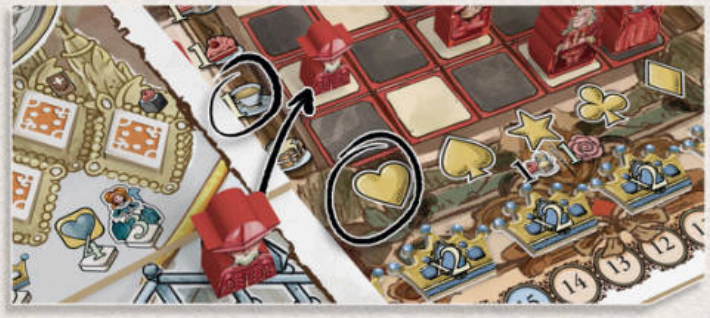

Capturing Example: Carmen captures a White Queen and places it in the Red Jail area of her Courtier Board. As the captured piece is a Queen, she gains 1 White Cat Pawprint, 1 Cherry Cake, and 1 Time.

Can't or don't want to perform the action: If you don't perform the action, gain 2 Time and Rest.

Rescuing a Piece: If you wish to move a captured piece by any player (including yourself), you can rescue it, placing it on any empty respawn space marked with the piece's Colour to activate its row and column. The person who had it in its jail gains 1 Time as compensation. If all the respawn spots are occupied, place the piece in any free space.

Rescuing a Piece Example: Kortes needs a Red Pawn but Vera has it captured. Kortes moves it to a red respawn space and resolves the action (the pawn does not move); Vera receives 1 Time.

Pawn Promotion: If a Pawn reaches the final row gain 1 matching-Colour Cat Pawprint, move it to a matching respawn space activating it: gain its resource and resolve that new space

c. Repeat Action (Optional x1)

Pay 6 Time (only once per turn) to activate the action just executed a second time, this means using the same Colour and paying the cost of the second action. No new cards are played.

You cannot repeat the action if you cannot activate the same Colour (i.e., the path is finished).

After activating a Spades action, Kortes trades 2 cake resources to move his red messenger forward 2 spaces. One of the bonuses he gains on that space is 2 Time units. She now has enough Time to repeat the action, so she pays 6 Time and another cake resource to move his Madhatter forward one more space.

d. Rest (Cleanup)

The last part of the turn involves refreshing your hand of cards, the card market, reactivating Bookmarks, and scoring Alice's Wishes if it is the case.

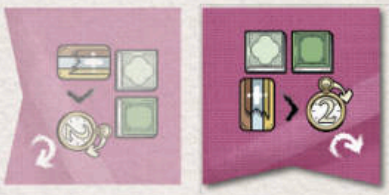

Draw: Refill or discard to your hand size (usually 3). Shuffle discard pile if the deck is empty.

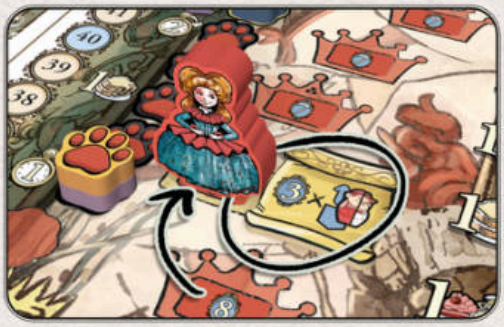

Refill: Replenish the Card Market display sliding the cards to the left to fill the gaps, if needed.

Reactivate: Flip any used permanent Bookmark tiles to their active side. (See "CLUBS")

Alice's Wishes: If Alice reached a Wish space this turn, all players score it now. (Check that you have removed a Crown due to this Alice Movement).

Section Summary: A turn is four phases: 1. Discard a card for its reward. 2. Play a card to move a piece, gain a resource, and perform an action (capturing or rescuing pieces is possible). 3. Optionally, pay Time for a Repeat Action (same action, same Colour and paying action cost). 4. Draw back up to hand size, shuffle the discard pile if necessary, refill the Card Market, Reactivate Bookmarks and score Alice's Wishes scoring conditions if triggered.

Actions

When activating a Chess piece, you may perform 1 action with the Colour of the activated piece, the action activated will be indicated by the column where its movement ends. You can only perform the action 1 time per activation, even if you can pay for more.

Costs: The resource costs, associated with the colour of the activating piece, are:

Paying costs: All activation costs have to be paid before receiving any reward.

Red pieces: Cherry Cake and/or Tea.

White Pieces: Buttered Toast and/or Tea.

COSTS are always represented with a BLACK number and the icon to pay.

Rewards: They are anything you obtain while performing actions directly or as a result of any secondary effect (e.g. resources, time, black cubes, acquiring or inviting a card, Living Flowers, Mini-Actions, Cat Pawprints, Alice Progress, Crowns, IPs, etc.)

Getting various rewards: When getting more than 1 reward in the same turn, you gain them in the order you want.

Immediate Use: When you gain any reward, it must be resolved during the specific action in which you gained it.

No Delay: You cannot wait to resolve any reward later in your turn (e.g., you cannot wait to activate it during a Repeat Action step).

REWARDS are always represented with a WHITE number and/or the icon to get.

Mini-Actions

Mini-actions (represented by icons showing the main action icons with inverted Colours rewards) grant you part of the benefits you would get by performing a main action. Each Main Action has its related Mini-Action. Mini-Actions do not have Colour restrictions.

TIP: Mini-actions are powerful for triggering combosand allow you to interact with board areas different from your main action.

WILD ACTION

The central column of the Chessboard shows a star, this means you can perform any of the 4 actions, but it has a cost: you MUST pay an additional resource of your choice (Cake, Toast or Tea) in order to perform the action. You can directly use the resource you gain in the row, so you don't need to store that just gained resource.

If you choose to repeat action (stepd.), you don't have to pay a second activation resource, but, as usual, you have to perform the same action with the same Colour.

HEARTS: The Garden of Live Flowers

In the Garden, players plant red or white rose bushes to decorate the realm for the ceremony.

Action Sequence

Gardener Movement (Optional): Before planting, you may move the matching-Colour Gardener one matching-Colour space left or right for 1 Tea per move (you can pay 2 to access all spots).
Note: Moving a Gardener from its rest space into the Garden is Free. Place it on any of the 4 matching Colour spaces. See Gardener Rest.

Acquire a Heart: Take the lowest matching-Colour Heart token from your Courtier Board. Pay the indicated cost (Cakes or Toasts) and gain the revealed reward.

Plant the Rose Bush: Place the token in an empty space in the Gardener's current zone. Gain the reward covered by the token (if a Live Flower, take it from the supply).

Hearts (Rose Bush) of same colour milestones:

3rd Bush: Gain 1 Alice Progress.

4th Bush: Gain 1 Mini-action.

5th Bush: Gain 1 Crown

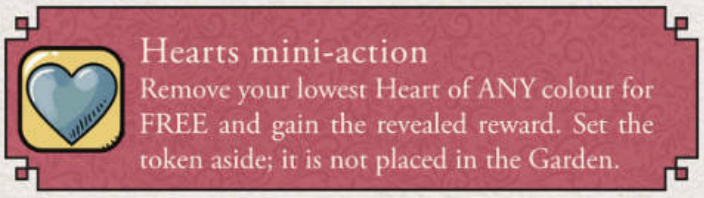

Live Flowers: Most of the rewards are Live Flowers which grants you permanent benefits during the game. You can place your flowers on your player aid to remember your benefit. See the details of each benefit in ANNEX I.

Gardener Rest: If no empty spaces remain in the Gardener's zone after planting, return the Gardener to its rest space.

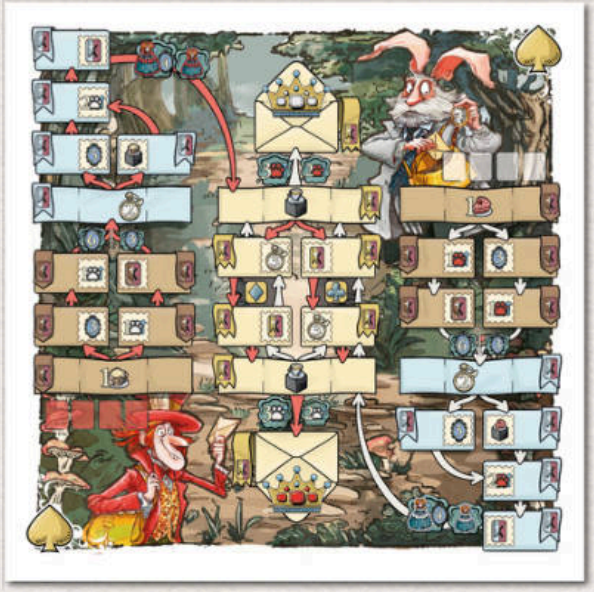

Example: Carmen pays 1 Tea to move the Gardener to a specific zone (A), she pays 2 Cakes (B) for a Red Rosebush (C) and gains a Silver Card (revealed on her board) (D), and covers a Yellow Flower in the Garden to take that flower from the supply (E).

Summary of Hearts (The Garden of Live Flowers): Optionally move the Gardener with Tea, then pay the cost to unlock a Heart token from your board. Then, place the Heart as a Rosebush in the Garden to gain the covered space reward and the revealed reward from your Courtier Board. This action is the only way to acquire the permanent rewards of the Live Flowers. With the mini-action, you just remove for free the Heart in the lowest position of any colour from your Courtier Board and gain the revealed reward.

SPADES: The Messengers of the King

The King's Messengers (Red Hatter and White March Hare) deliver invitations to the banquet and request collaboration.

Action Sequence

Pay and Move: Move the Messenger of the activated Colour forward a number of spaces along the arrows depending on the resources you pay:

1 Space: 1
2 Spaces: 2
3 Spaces: 2 1

1 Space: 1
2 Spaces: 2
3 Spaces: 2 1

Some spaces let you choose your path. Spaces can be occupied by several players.

TIP: usually, it is worthy to advance the most you can.

Crossing Seal Milestones: If you pass an arrow with a seal you get a bonus:

First player: Gain the large icon reward (IP or Cat Pawprints).
Subsequent players: Gain the small icon reward.

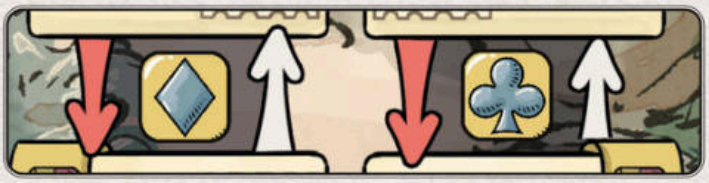

Central Zone: Crossing into this zone always grants 1 Alice Progress.

Rewards: Gain only the reward printed on your destination space and a Card Reward.

Card Reward · Choose one:

Acquire: Buy a card of the level shown on the banner of your space (paying its market cost).
Invite: Cull a card from your hand or discard pile and place it below your Courtier Board for end-game IP.

Central bifurcation: Grants a free mini-action when crossed. (It is not a Seal)

Path Milestone: Reaching the end of the path grants a matching-Coloured Crown.

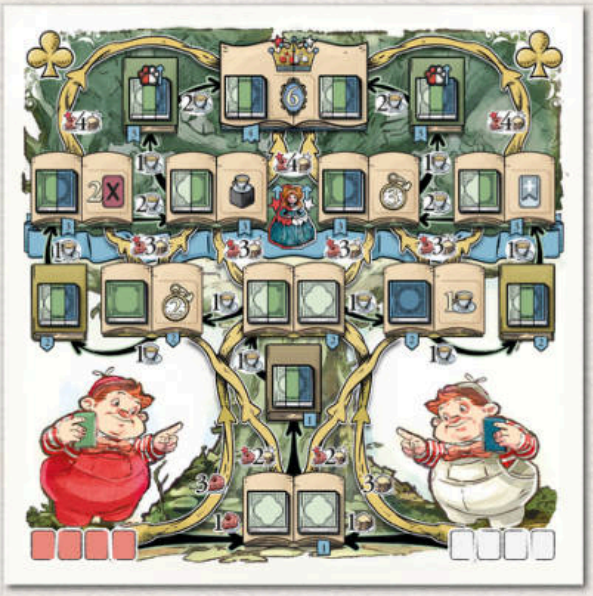

Example: Carmen moves the White March Hare 3 spaces by spending 1 Toast, 1 Tea (A), and 3 Time (as a virtual Toast) (B). She ends on a space granting 2 Cat Pawprints and a Silver Card Action (C). As the first to cross the Seal Milestone during this move, she also gains 6 IP (D).

Spades mini-action

Move ANY Messenger exactly ONE space forward for FREE. Resolve all rewards (Space Reward, Card Reward, Crossing Milestones or Central bifurcation bonus) as usual.

Summary of Spades (The Messengers of the King): Pay a resource cost (Cake/Toast and Tea) to move the Messenger (Red or White) 1, 2, or 3 spaces. Gain the reward of the final space and the option to Acquire or Cull a card. Gain milestonesesfor crossing certain spaces. With the mini action you just move any Messenger ONE space and take the rewards there..

CLUBS: The Tree of Tweedledee and Tweedledum

At the Twins Tree, players move Tweedledee (Red Twin) or Tweedledum (White Twin) in an ascent that represents learning stories from the Looking-Glass World to tell during the banquet.

Activation Sequence

Pay and Move: Choose a path following an arrow and pay this arrow depicted cost (you cannot pass through 2 different arrows):

Yellow Arrow show the two possible costs to be paid depending on the Twin moved: Cake (Red Twin) or Toast (White Twin).

Black Arrows show the actual cost to be paid.

Get Rewards: Take any physical Book tokens from the space. You also gain the printed Book tokens (choosing the colour when more than 1 is depicted) or rewards shown on the board space. Any printed reward covered by a Book token before the movement is not gained. The first Twin accessing a space with a physical book will gain 2 books. The Twins accessing a space without a physical book in further turns, will get a book and the other printed reward.

Buy a Bookmark (Optional): Spend your Books to buy one Bookmark tile. You can check all the available Bookmarks and select the one you want to get. These grant instant rewards, permanent benefits, or end-game scoring.

Notes: Any space can be occupied by several Twins. The height you reached with your twin is indicated in the bottom of the space (as shown in the image).

Milestones:

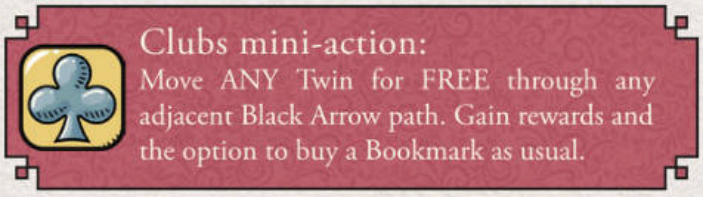

Height Bonus: Passing from the 2nd to 3rd height grants 1 Alice Progress of the matching Colour.

Path End: Reaching the top grants 1 Crown matching the twin colour.

Example: Camila moves a White Rook and advances the White Twin forward left for 3 Toasts (A). She crossesa space granting Alice Progress (B), takes a physical White Book, and gains a printed Green book (C). She then spends the gained books and a white one she already had to buy a mini-action Bookmark (D).

Summary of Clubs (The Tree of Tweedledee and Tweedledum): Pay a cost to ascend the Tree with the corresponding Twin. Gain Books (or the space reward if Books were already taken) and optionally spend Books to buy 1 Bookmark. Triggers 1 Alice Progress and 1 Crown at key points along the path. With the mini-action you just move the twin you wish through any adjacent Black Arrow path and gain the rewards of the destination as usual.

DIAMONDS: The Wall of Humpty-Dumpty

Humpty Dumpty has crashed in two, with one part loyal to the Red Court and the other preferring the White Administration. Players help Humpty Dumpty build the red and white parts of the wall and climb it to make its ideas clear and guard the capital.

Activation Sequence

Choose a spot on the wall of the matching colour of the piece moved and pay the cost indicated in the row and column (add both). Note that 2 columns have 1 Tea cost and other 2 don't have a cost, but all rows have a cost.

Placement Rule: Diamonds must be placed on the lowest free space of a column of your choice. An Egg half doesn't need to be on that row.

Select any Diamond on the colour of the piece moved and get Rewards:
Gain the reward next to the diamond token on your courtier board.

Gain the covered reward on the Wall space.

Same-Level Bonus: Gain 2 IP when building on the same row as the matching-Colour Egg half.
Row Completion: If your brick completes the row, advance the Egg half to the next row and gain 4 IP, instead of 2.

Diamond Milestones:

3rd placed Diamond (of same Colour)

4th placed Diamond (of same Colour)

5th placed Diamond (of same Colour)

Example: Kortes has activated Diamonds action with a red piece and builds in the Red area. She pays 1 Cake and 1 Tea for a first-row space. She reveals 1 Cat Pawprint on her board (A) and covers 2 Cat Pawprints (B) on the Wall. Because her brick completes the row, she gains 4 IP and moves Red Humpty Dumpty's half up (C).

Diamonds mini-action

Remove a Diamond of ANY Colour from your board for FREE. Gain the revealed reward and set the token aside (do not place it on the Wall).

Summary of Diamonds (The Wall of Humpty-Dumpty): Pay the cost of the selected spot to place your Diamond, take any of the matching colour from your board, gain the associated reward and then, place the Diamond as a brick on the Wall, gaining the covered reward. Score IPs for building on the Humpty-Dumpty level and bonus IPs for completing a row. Milestones grant Alice Progress, mini-actions, and Crowns. With the mini-action you just remove a diamond from your Courtier board for free and gain the rewards.

Turn examples

Alice Progress Turn Example: Cris discards a White Pawn Card to gain 1 Time (A)), then moves a Red Knight into the Hearts Column to gain 1 Cherry Cake (B).

She decides not to move the gardener, pays 2 Cherry Cakes to place a Red Heart (C), she gains the Red Alice Progress next to it (D) and covers and takes a Blue Flower from the supply (E).

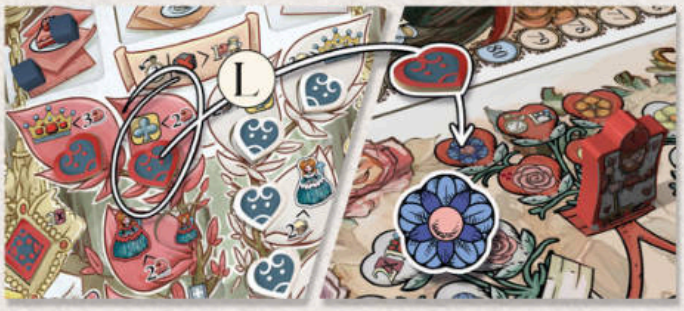

Red Alice advances 1 space. However, the next space on Alice's Path is already occupied by a Crown, so she skips it and moves to the next available space, granting Cris 8 Influence Points (F). In addition, this space is an Alice's Wish space, so Cris immediately removes a Crown from the Crown Display (G) and places it on Alice's Wish. At the end of her turn, all players will score that Alice's Wish (H). She has not enough time to repeat the action, so she will Rest.

Mini Action + Crown Turn Example:
Camila discards a Silver White White Bishop Card to gain 1 Cherry Cake and 2 PIs (I), then plays and moves a Red Knight into the Hearts Column to gain 1 Cherry Cake (K).

Next, she pays 2 Cherry Cakes to place a Red Heart, covering and taking a Blue Flower from the supply (L).

She decides to get the flower reward first and then gains the Twins Mini-Action next to the taken Heart, which allows her to move a Twin along a black path. Having prepared for this moment, Camila moves the White Twin to the last space on that path (M), gaining a Crown (N) and 3 Books choosing 2 Blues and 1 White to immediately exchange them for a Final Score Bookmark (O). NOTE: Remind that the rewarded Mini-Action may be taken in any of the Colours, no matter which colour piece has triggered the Mini-Action.

She then takes the next available Crown from the Crown Display and places it on the White Alice's Path, starting from Alice's current position. The first next space is unavailable because it is an Alice's Wish space (not Crowns Allowed), and the second space is already occupied by another Crown, so the Crown is placed on the third space instead (Q). As this space covers a Influence Point value, Camila gains double the points shown (7 × 2), for a total of 14 Influence Points.

Game end

The game ends when the last Crown is removed. Once the last Crown is removed, the current round is finished; that is, play continues until the person to the right of the player with the Starting Player token completes their turn.

Final scoring

Alice's Coronation: Alice is crowned with the Colour that has advanced the most.

If one Alice piece is further ahead than the other: The Alice's Wishes of that side (the more advanced Colour) are flipped showing the platinum background. Each person receives 8 points for each Crown of that Colour that they have achieved (checked on the Courtiers and Main Boards).

If the Alice pieces are tied: Neither set of Alice's Wishes is flipped. Each person receives 8 points for each Crown they have achieved, regardless of Colour.

Cat's Progress (Alice's Wishes Scoring): Check the level achieved by each of your Cat's Pawprints.
Depending on the height on each Colour track, scoring occurs:

Further than x1 & before x2: Score one of the Alice's Wishes of that Colour, of your choice.
Further than x2 space: Score both Alice's Wishes of that Colour.

If any of the wishes are flipped due to Alice's coronation you will earn the points indicated in the platinum side, and the standard points in case they are not.

Insufficient Level (lower than x1): If either or both Cats have not taken enough steps to reach the x1 level, no extra points will be gained at the end of the game.

Invited Guests: Sum up the points on the cards you have in your guests area (top-right zone of the card. SEE ANNEX II

Scoring Bookmarks: If you have end-of-game scoring bookmarks (from Tweedledee and Tweedledum action), add up the corresponding points.

Final scoring example

The game ends and Alice's Coronation begins, proclaiming Alice as the Red Queen. As a result, Red Alice's Wishes are upgraded by flipping them showing the silver background (A). In addition, since the Coronation is red, each player gains 8 Influence Points for each Red Crown they have obtained. Vera has obtained 2 Red Crowns: one for planting all Red Rose Bushes, and one for building all Red Diamonds in the Humpty-Dumpty Wall. She therefore gains 16 Influence Points (2 × 8 IP). Vera has also obtained 1 White Crown by reaching the end of the Twins Path. However, since the Coronation is red, this White Crown does not grant any additional Influence Points.
Now Vera checks her Cat Pawprint position. She has passed through the ×1 space on both the red and white tracks, but she has not reached the ×2 space on either track (B).

As a result, she must choose one Red Alice's Wish and one White Alice's Wish to score. She chooses to score the Diamond Wish and the Twins Wish (C). She has built all of her Diamond tokens, and since the Wish is upgraded, she gains 4 Influence Points for each Diamond built, for a total of 40 Influence Points (4 × 10).
She has achieved 4 steps with the White Twin and 2 steps with the Red Twin (D). Each step is worth 3 Influence Points, so she scores a total of 18 Influence Points (6 × 3 IP). This results in a total of 74 Influence Points (16 IP from Crowns + 40 IP from the Diamond Wish + 18 IP from the Twins Wish).
In addition, she must score her Invited Cards. In her guest area, she has 2 basic Pawns, each worth 1 Influence Point, for a total of 2 Influence Points (E). She also has 1 Silver Pawn, which grants 2 Influence Points for each White Pawn culled. Having culled 3 White Pawns and 1 wild Pawn, she gains 8 Influence Points (F). She has 1 Gold Pawn that grants 2 Influence Points for each Pawn culled. With 5 Pawns culled, she gains 10 Influence Points (G). Finally, she has 1 Gold Pawn that grants a flat 6 Influence Points (H). In total, she gains 26 Influence Points from Culled Cards. Added to the previously scored 74 Influence Points, this gives Vera a final total of 100 Influence Points.

Victory

The player with the most Influence Points (IP) becomes the new Queen Alice's chief advisor and claims victory. In case of a tie, the Queen decides to have more than one person by her side, and they share the victory.

Section Summary: The game ends after completing the round in which the final Crown is removed. Final scoring involves: 1. Alice's Coronation (8 IP per Crown of the winning Colour Colour and Alice's wishes flip). 2. Cat's Progress (scoring Alice's Wishes based on Level x1 or x2). 3. IP from Culled Cards. 4. IP from end-of-game Scoring Bookmarks. The player with the highest IP wins.

Solo Mode: Dinah

In solo mode, you compete against Dinah, the mother of the two kittens in Throughthe Looking-Glassand what Alice Found There,an automated opponent that challenges you for resources, Alice Progress, and kingdom control.

NOTE: Queen Alice has a complex kind of interaction, in case of an undefined situation the player may choose how to solve it ,i.e. if Dinah can capture both a King or a Queen, you may choose which piece to capture.

1. Dinah Setup

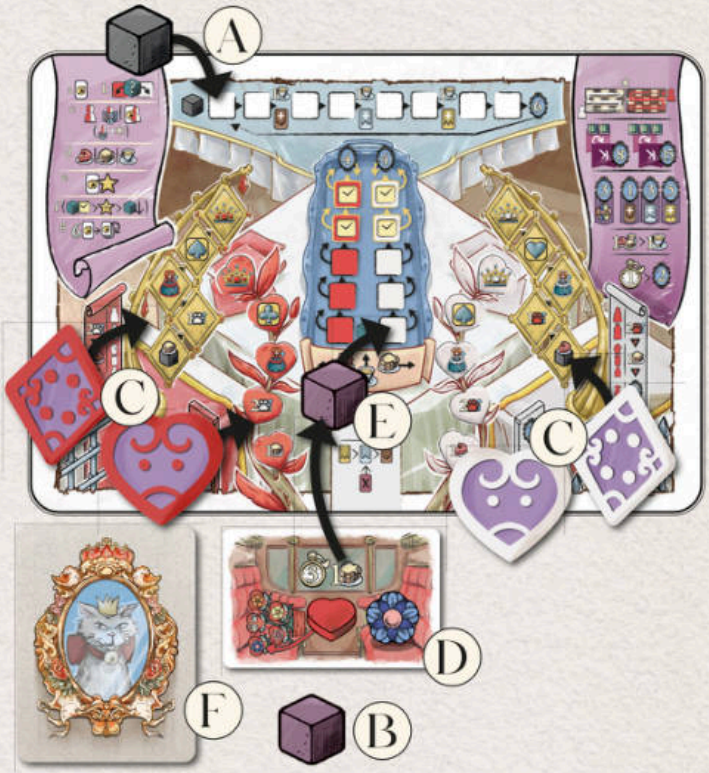

Board & Pieces: Set up the main board for a 2-player game. Select 1 of the 4 difficulty levels of Dinah's boards (back of Courtier boards), Green: Easy, Purple: Normal, Orange: Difficult, Blue: Very Difficult and prepare it with:

A · Black cubes track: Place 1 Black Cube in the upper track.
B · Colour marker: Place 1 colour cube as Colour Marker (See 2. Turn Sequence)
C · Kingdom Pieces: All matching-Coloured Hearts and Diamonds in their slots.

D · Train Cards: Shuffle the Train cards. Draw 2 for yourself and pick 1. Give the other to Dinah and apply the benefits of the side opposite to your choice (e.g., if you picked the White side, the Dinah gets the Red side).

E · Initial Resource: Place 1 cube in the Resource Track depending on the resource shown in the train card. If a toast place it at the bottom of the white column. If a pie place it at the bottom of the red column.

F · Dinah's Deck: Shuffle the 10 solo cards (2x Pawn, Bishop, Rook, Knight; 1x King, Queen), form a deck and place it near to Dinah's board.

2. Alice's Progress, Alice's Wishes and Crowns

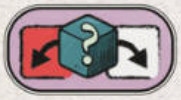

Dinah gets all the benefits a normal player would get. She advances Alice's tracks, places Crowns and scores Alice Wishes during the game.

When getting resources she has a different way of managing it and when getting time she earns IP for every unit of time she would have won.

She is also able to repeat actions once per turn and will score at the end of the game by the same criteria, plus some aditional IP for every acquired card that has not been invited.

3. Turn Sequence

Draw: Flip the top card from Dinah's deck.

Colour Determination: Use one coloured cube to mark the Colour (Red or White) in the drawn card based on the Dinah's current resource board row.

Movement: Move the indicated Chess piece according to the following priority.

Capturing: Capturing takes absolute priority. Dinah always captures the highest-value piece available. In case of a tie for value, you decide which piece she will capture.

Rescuing: If the piece is captured, Dinah rescues it following the criteria on its board (top right).

Card criteria: depending on the colour determined follow the movement pattern in the card by order (left to right, up to down).

If Dinah is moving either a rook, bishop or queen, she advances the piece as much as possible until it reaches the border of the board, captures another piece or gets blocked by other piece of the same colour.

Resources: Gain the resource from the landing row (wild resource= Tea).

Action: Completely ignore the action on the landing column. and perform the Action indicated on the card.

Repeat Action: If the resource cube is in a , return the cube to the bottom row and repeat the action.

Reshuffle: in case she has played 6 or more cards, shuffle her discard pile with the rest of the deck, if any, and form a new deck for the next turns.

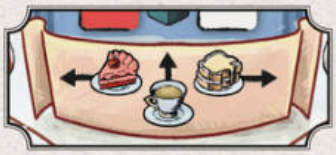

4. Dinah Resource Logic

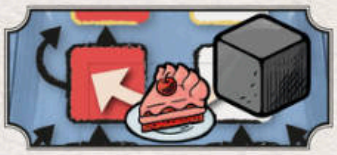

Dinah NEVER pays resources and she gains them in a different way

Time: whenever Dinah gains Time it is converted into IP (1-2-3 depending on the difficulty level).

Resources: Move her resource cube Left () or Right () in the Resource Track. If she gains Tea or would bounce to a side, move the cube Up. If the resource cube is at the topmost space she gains 4 IP instead.
Note: Its starting position depends on Dinah's Train card.

Cat Progress: Whenever the resource indicator moves upwards by bouncing to a side, Dinah also gains the indicated Cat Pawprints (in the boards where they are present).

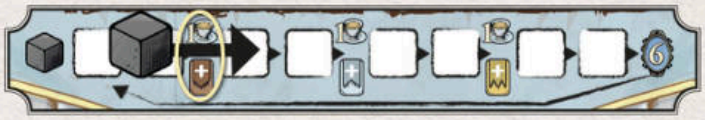

Cards:
To Acquire, take the leftmost card of that level and stack it.

To Invite, cull the highest-level card from its stack. If she has no cards to cull, she acquires a Bronze card instead.

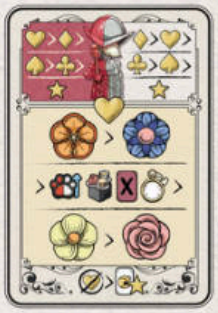

Black Cubes: Move the black cube in the track to the right giving Dinah the reward when crossed. If the cube gets to the last space and must move once more, bring the cube back to the beginning and Dinah gets 6 IP.

Mini-Action: If Dinah has to make a mini-action, she does it with the opposite colour of the played action. If she can't perform that mini action with the opposite colour she performs the mini action with the active colour instead.

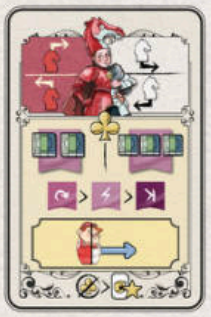

5. Piece Actions

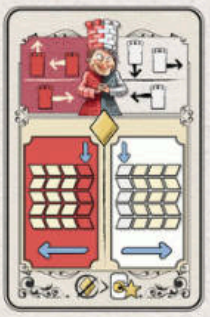

Pawn: Move a non-blocked Pawn which is still the board, following the priority criteria in the card depending on the active Colour. In the given case that there are more than 1 pawn in the same row, move the most advanced one.
Action (♥): Take the lowest Heart. Plant it in the garden space indicated by the priority arrows, where the gardener is located. Dinnah cannot plant a flower type of which she already has 2 Live Flowers. If she cannot plant it where the gardener is, move the gardener clockwise.

Bishop: Move the bishop as far as possible diagonally.
Action (♦): Move the corresponding Messenger 2 spaces, invite the top card of the acquired cards deck (this does not count as an invite reward, meaning that Dinah will not acquire a bronze card if she has no cards in its deck) and then get the reward on the landing space. If there are no cards in its acquired cards deck, move 3 spaces, take the leftmost card on the level indicated by the banner space and then the reward on the landing space. When facing a bifurcation Dinah chooses left or right depending on what the arrow at the bottom of the card indicates.

Knight: Move the knight forward if possible, if not move sideways, then follow arrow priorities.
Action (♣): Advance the matching color Twin through yellow paths (arrows), acquire a bookmark and obtain its benefits. She never takes books, although when she lands on a space with physical white books she removes them from the board as if she had taken them. Dinah prioritizes completing Bookmark sets (Immediate + Once per turn + End-game) of cost 2, then cost 3. When taking inmediate bookmarks she prioritizes the ones with cat paws as bonuses. Paw bookmarks: Takes the bookmark granting the most pawprints, in case that both colors are available, takes 1 randomly. For the rest of the bookmarks: Takes one randomly.

Rook: Move the rook as far as possible following arrow priorities.
Action (♦): Take the lowest available Diamond of the active colour from Dinah's board and place it in the lowest valid space matching the card's arrows priority for that colour. Gain board and wall benefits as well as Humpty-Dumpty IPs.

Queen: Move the queen following arrow priorities.
Action: First, Invite the2 topmost cards in her acquired cards deck. Then, draw a new card to perform the action shown on that card. Do not move that chess piece.

King: Move 1 space following arrows.
Action: Gain 2 Cat Pawprints of its Colour. Then, draw a new card to perform the action shown on that card. Do not move that chess piece.

6. Exhaustion

If an action is fully completed/unavailable, draw a new card and perform the action shown on that card. As with the king and the queen, do not move the chess piece shown on that card. Just perform the action.

7. Dinah Final Score

At the end of the game, Dinah scores just like a human player, choosing the Wish that gives her the most points, if she has reached x1 (and both if it has reached x2, as usual). In addition, after scoring the Invited Cards, she scores points for: (1) Once Per Turn and End Scoring Bookmarks, (2) Flowers, and (3) acquired cards that were not invited, the number of points depicted in each Dinah's boards (the number of points will depend on the difficulty level of the board).

ANNEX 1

Live Flowers (Permanent Benefits)

In the Live Flowers Action board (Hearts), players can acquire "Live Flowers", which grant a permanent benefit. The benefit improves when acquiring 2 of the same type; having more than 2 flowers of the same type is allowed but provides no additional advantage.

Allows you to use the Wild Action column on the Chessboard for free.

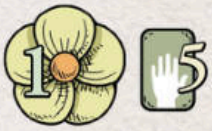

If the newly activated piece ends its movement on the 4 central rows, you will gain the amount of Time indicated in addition to the resource.

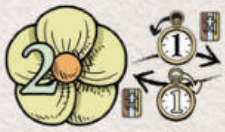

The cost to repeat an action is reduced from 6 to 5 Time.

The repeated action receives a discount of 1 Resource of any kind.

Permanently increases your hand size up to 5 cards.

Allows you to change the level of the card acquired from the Market. You can choose to pay 1 Time per level increased or gain 1 Time per level decreased when acquiring a card (e.g., spend 2 Time to upgrade a Bronze card to Gold, or gain 2 Time to downgrade a Gold card to Bronze). You choose the level first and pay or get the time, then acquire the card paying the extra cost if any.

You only need to pay 2 Times as a resource, instead of 3.

Allows you to exchange 1 Tea for 2 Times. You can make this exchange any number of Teas.

ANNEX 2

Cards

Points for Guests:

If this card is Invited, you get the points indicated

If this card is Invited, you get 2IPs for every invited card of this same type, including this one, and in the Colour indicated.

If this card is Invited, you get 2IPs for every invited card of this same type, including this one, and in any Colour.

If this card is invited, you get 1 point for every acquired card. This all means Bronze, Silver and Gold cards either Invited, in your deck, hand or discard pile.

If this card is invited, you get 1 point for every card Invited.

1 Resource

1 Resource Discount, you can choose the resource to be discounted.

1 Resource, you can choose the resource to gain.

2 Resource Discount, you can choose the resources to be discounted.

Gain 1 Black Cube assigning it to the indicated resource.

KINGS

Discard a second card to get its discard reward, this second card can only be Basic or Bronze card.

Acquire 1 Bronze card

Discard a second card to get its discard reward, this second card can only be Basic, Bronze or Silver card.

Acquire 1 Bronze card + 1 Time

Discard a second card to get its discard reward.

Acquire 1 Silver card + 1 Time

ALL: You can perform whatever action you wish no matter where King's piece ends its movement.

QUEENS

Capture 1 pawn of the opposite Colour of the Queen.

Invite 1 guest

Capture 1 piece, but a King or a Queen on the opposite Colour of the Queen.

Invite 1 guest + 1 Time

Capture 1 piece, but a King or a Queen on the opposite Colour of the Queen + advance 2 cat steps of the opposite colour.

Invite 2 guest

ANNEX 3

Bookmarks

INSTANT TILES

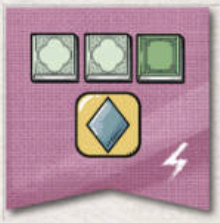

COST
2 any Colour Books
INSTANT
Gain 2 time

COST
2 White books
INSTANT
Gain the indicated number of pawprints in the indicated Colour

Only for 3-4 players

COST
2 White books + 1 Green book
INSTANT
Gain the mini-action indicated (Hearts or Diamonds)

PERMANENT ACTIONS TILES

Flip it when you use it and reactivate it once you Rest.

COST
1 White book + 1 Green book
ONCE PER TURN
Get 2 Time if you gain at least 1 Black Cube as Additional Storage Capacity.

COST
1 White book + 1 Green book
ONCE PER TURN
Get 2 Time if you acquire at least 1 card this turn.

COST
1 White book + 1 Green book
ONCE PER TURN
Get 2 Time if you Invite at least 1 card this turn.

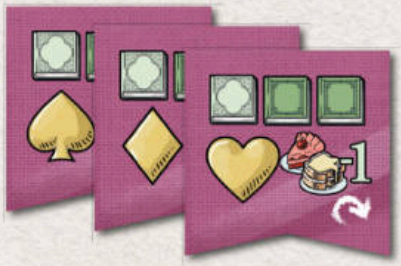

COST
1 White book + 1 Green book
ONCE PER TURN
Get 2 Time if you Capture at least 1 piece this turn.

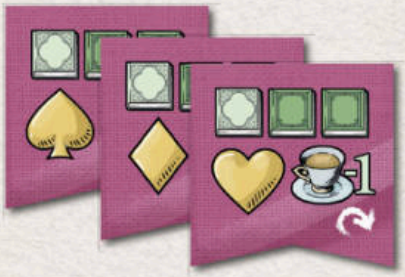

COST
1 White book + 1 Green book
ONCE PER TURN
Get 2 Time if you Release at least 1 piece this turn.

COST
1 White book + 1 Green book
ONCE PER TURN
Get 3 Time if you move any Alice up in their path this turn.

COST
1 White book + 2 Green books
ONCE PER TURN
Get a discount of 1 Cake or 1 Toast when performing Spades / Diamonds / Hearts action.

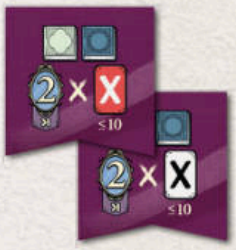

COST
1 White book + 2 Green books
ONCE PER TURN
Get a discount of 1 Tea when performing Spades / Diamonds / Hearts action.

FINAL SCORING TILES

COST
1 White book + 1 Blue book
FINAL SCORING
2 IPs for every advanced cat pawnprint in the Colour indicated. Maximum 10 steps.

COST
1 White book + 1 Blue book
FINAL SCORING
2 IPs for every invited guest in the Colour indicated. Wild cards count as both Colours at the same time. Maximum 10 cards.

COST
1 White book + 1 Blue book
FINAL SCORING
2 IPs for every Bronze and Silver card acquired. Maximum 10 cards.
4 IPs for every Gold card acquired. Maximum 5 cards.

COST
1 White book + 2 Blue books
FINAL SCORING
6 IPs for every Black Cube unlocked as Additional Storage Capacity. Maximum 5 cubes.

COST
1 White book + 2 Blue books
FINAL SCORING
3 IPs for every remaining Time on your clock. Maximum 10 Time.

COST
1 White book + 2 Blue books
FINAL SCORING
8 IPs for every advance in White/Red Alice's Path. You can check this in your Courtier board for Hearts and Diamonds and in the Action Board for Spades and Clubs.

ANNEX 4

Alice's Wishes

Gain 2 IPs (Flipped side: 4 IPs) for every removed Heart.

Add up both Red and White Hearts.

Gain 5 IPs (Flipped side: 9 IPs) for every pair of White and Red removed heart.

Gain 7 IPs (Flipped side: 12 IPs) for every pair of Live Flower of the same Colour

Gain 11 IPs (Flipped side: 16 IPs) for every 3 different Colour Live Flowers

Gain 1 IPs (Flipped side: 2 IPs) for every advanced step in the King's Messengers, add up steps of White and Red Messengers.

Gain 2 IPs (Flipped side: 4 IPs) for every pair of White and Red advanced steps in the King's Messengers.

Gain 2 IPs (Flipped side: 3 IPs) for every advanced step in Bronze and Gold spaces. Add up the steps of White and Red Messengers.

Gain 5 IPs (Flipped side: 8 IPs) for every Arrow crossed showing a seal.

Gain 3 IPs (Flipped side: 6 IPs) for every advance step in the Twins Tree. Add up the steps of White and Red Twins.

3 See the number on the bottom of the space where both of your twins are.

Gain 7 IPs (Flipped side: 12 IPs) for every pair of White and Red advanced steps in the Twin's Tree.

3 See the number on the bottom of the space where both of your twins are.

Gain 1 IPs (Flipped side: 2 IPs) for every book acquired.
Add up both remaining unspent books and the books shown on the Bookmark tiles you own.
You can score MAXIMUM 20 books (20 IPs / 40 IPs)

Gain 3 IPs (Flipped side: 5 IPs) for every Instant or Permanent Bookmark Tile you own.
Add up both Red and White Hearts.

Gain 2 IPs (Flipped side: 4 IPs) for every removed Diamond.

Add up both Red and White Diamonds.

Gain 5 IPs (Flipped side: 9 IPs) for every pair of White and Red removed Diamond.

Gain 3 IPs (Flipped side: 5 IPs) for every Diamond of your colour placed in the same row or below Humpty Dumpty's token.

Add up both Red and White Diamonds.

Gain 3 IPs (Flipped side: 5 IPs) for every Diamond of your colour placed in a different column of Humpty Dumpty's Wall.

Add up both Red and White Diamonds.

ANNEX 5

Train cards

3 Time
1 Toast / Cake
1 Pink Flower.

ACTION ADVANCE
Place your lowest Red/ White Heart where depicted in the card. You don't get an extra resource for taking out the Heart or an extra flower.

3 Time
1 Toast / Cake
1 Blue Flower.

ACTION ADVANCE
Place your lowest Red/ White Heart where depicted in the card. You don't get an extra resource for taking out the Heart or an extra flower.

3 Time
1 Toast / Cake
1 Orange Flower.

ACTION ADVANCE
Place your lowest Red/ White Heart where depicted in the card. You don't get an extra resource for taking out the Heart or an extra flower.

3 Time
1 Toast / Cake
1 Yellow Flower.

ACTION ADVANCE
Place your lowest Red/ White Heart where depicted in the card. You don't get an extra resource for taking out the Heart or an extra flower.

3 Time
1 Toast / Cake
1 Depicted "Once per turn" bookmark.

ACTION ADVANCE
Place your Red/White Twin in the bottom space of the tree (marked with 1).
You don't receive the 2 Light Green books.

3 Time
1 Toast / Cake
1 Depicted "Once per turn" bookmark.

ACTION ADVANCE
Place your Red/White Twin in the bottom space of the tree (marked with 1).
You don't receive the 2 Light Green books.

3 Time
1 Toast / Cake
1 Depicted "Once per turn" bookmark.

ACTION ADVANCE
Place your Red/White Twin in the bottom space of the tree (marked with 1).
You don't receive the 2 Light Green books.

3 Time
1 Toast / Cake
1 Depicted "Once per turn" bookmark.

ACTION ADVANCE
Place your Red/White Twin in the bottom space of the tree (marked with 1).
You don't receive the 2 Light Green books.

3 Time
1 Toast / Cake
1 Black cube as the resource depicted.

ACTION ADVANCE
Place the diamond rewarding 1 black cube card in the forth column at the second space from the bottom of the Wall. (Columns are counted from Humpty Dumpty)
You don't receive any extra reward for removing or placing the Diamond.

6 Time
1 Toast / Cake

ACTION ADVANCE
Place the diamond rewarding 2 Times in the first column bottom space of the Wall. (Columns are counted from Humpty Dumpty)
You don't receive any extra reward for removing or placing the Diamond.

5 Time
1 Toast / Cake
1 Cat Pawprint (you don't earn an extra time for this advance)

ACTION ADVANCE
Place the diamond rewarding 1 Cat pawstep in the third column at the bottom space of the Wall. (Columns are counted from Humpty Dumpty)
You don't receive any extra reward for removing or placing the Diamond.

4 Time
1 Toast / Cake
1 Bronze card (from the central space in the Bronze card display).

ACTION ADVANCE
Place the diamond rewarding 1 Bronze card in the second column at the second space from the bottom of the Wall. (Columns are counted from Humpty Dumpty)
You don't receive any extra reward for removing or placing the Diamond.

4 Time
1 Toast / Cake
1 Bronze card (take the leftmost card from on the Bronze card display).

ACTION ADVANCE
Advance 2 steps the Messenger depicted.
You don't receive any extra reward by moving the Messenger.

2 Time
1 Toast / Cake
1 Silver card (take the leftmost card on the Silver card display).

ACTION ADVANCE
Advance 2 steps the Messenger depicted.
You don't receive any extra reward by moving the Messenger.

1 Toast / Cake
1 Gold card (take the leftmost card on the Gold card display).

ACTION ADVANCE
Advance 1 steps the Messenger depicted
You don't receive any extra reward by moving the Messenger.

4 Time
1 Toast / Cake
1 Black cube as the resource depicted

ACTION ADVANCE
Advance 3 steps the Messenger depicted.
You don't receive any extra reward by moving the Messenger.

ANNEX 6

Influence Points (IPs)

Any Piece

Capture any piece

Discard Reward/ Discard a card

Main Action bonus

Replenish your hand up to your hand limit

Gain the depicted number of Time

Pay the depicted number of Time

Wild action: Perform any of the 4 actions

Mini-Actions: Perform the miniaction (see each Action section)

Make Alice Progress in the track on the Red track

Make Alice Progress in the track on the White track

Make Alice Progress in the track of the colour from the performed action

Place a Crown in the track of the colour from the performed action

Place a Red Crown

Place a White Crown

Discard a Crown from the display

Cherry Cake

Butter Toast

Tea

Get a discount of the number depicted in the depicted resource

Get any resource.

Get the resource depicted

Pay the resource depicted. If all shown, pay any resource of your choice

Pay the number of resources depicted. The resource to pay will depend on the colour of the action performed.

Advance in the Red Cat Progress track

Advance in the White Cat Progress track

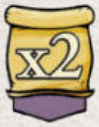

Advance in any Cat Progress track

Advance the Cat Progress the number of steps depicted in the track of the colour from the piece moved

Alice Whish (starting side)

Alice Wish (platinum side)

End game scoring: Score one Alice's Wish of your choice on this colour track.

End game scoring: Score both Alice's Wishes on this color track.

Bronze card Silver card Gold card

Acquire a bronze / silver / gold card

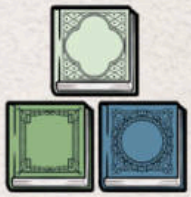

Acquire a bronze / silver / gold card or invite any card from your discard pile or from your hand

Invite any card from your discard pile or from your hand. When scoring: Invited cards

Invite a red / white card

Unlock a black cube and place it as the resource depicted

Remove a black cube from your resources storage area and place it back in the Black Cubes stock zone.

Take a book of the colour depicted

Take the book in any of the colours depicted

Any Living Flower

Get the depicted Living Flower

SOLO MODE

Dinah draws a new card

Dinah draws a new card and perform the action of the car without moving the piece.

Dinah repeats the action just performed.

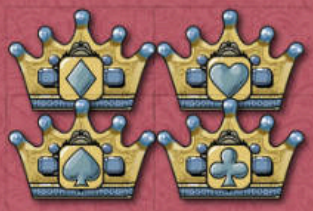

Used in Dinah's cards to indicate a generic black cube bonus.

Variants

Hidden objectives: Deal 1 card to each player. Use cards marked with ⁘ only for a 4 player game. This grants you 2 crowns of the depicted colour, and you will count them at final scoring as usual.

Use the card marked with ⁂ only for a 3 player game, this card grants you 16 points in case the 2 Alice Progress tracks are 1 space away from each other or less, in case these spaces are covered by a crown, this space is not counted. In case the 2 Alice Progress Tracks are tied, this player gains 8 more points: 24 points in total in case of tie.

Alternative crown rewards: Shuffle the mini-action crowns, place a x2 crown in the first empty slot on the left, followed by one of the mini-action crowns, and continue alternating in this way (x2 – mini-action) until the display is full. When placing a crown, always do so from right to left. Each one awards you the points for the spaces it covers and the mini-action bonus. You can always choose to receive double the points for the spaces covered instead of the benefit in question.

Asymmetric Initial Deck: The first player takes the asymmetric initial deck, takes one card and passes the rest to the player on their left. Repeat this process until each player has two asymmetric cards. Then, each player takes the matching card (in terms of colour and figure) from their initial deck, adds the two asymmetric cards and shuffles their deck. You can now start the game as usual.

Acknowledgements

Combo Games want to thank all the team who has took part of the Queen Alice project, in first place David and Héctor, for gifting us with the opportunity to develop and publish this amazing game. To Iván Iserte for his huge work, working against the clock and making the game as beautiful as easy to play like only a master can do. To Amelia Sales for making our game one of the most beautiful games ever. To every playtester who has made the game grow in each game, specially to Dani Garcia, Carlos Martínez "Gemerlos", Natalia Angulo, Juan Cantos, David Bernal, Antonio Guillamó "Guilla", Daniel Montesinos "Kabra", Johanna Frontado "Nana" and all the people who played Queen Alice in in TTS/Discord and during Protosy Miguelitos and Protosy Tipos. And overall, to our "Courtiers", all the Gamefound backers and board game media who spread the word to make Queen Alice possible.

I'm grateful to have my daughter Camila, who brightens up my day with her smile; to Keyla, who has given me a beautiful little girl and is proving to be the best mum in the world; to Héctor, for putting up with me and wanting to design the game of the year with me; and last but last but not least, to the whole Combo team for having blind faith in us, not telling us to get lost (at least not too often) throughout the development process, and for publishing the most beautiful game in the world.

David Heras:

I'd like to thank my family for always encouraging me to do what I love, my partner Cris for putting up with me and helping me day in, day out so that I can fulfil my dream of creating board games, David for giving me the chance to make this game with him and learn from him, to Combo for believing that we would be able to turn the idea we presented to them into something decent, and to all those people in the board game community who have helped make the game what it is, with your advice and words of support.
